

The FCC should not implement any proposal that would lessen Indiana's Telephone Privacy law Protection. This has been a blessing to us as we could never set down with out the telemarketers calling and getting us up,even on Sunday's it didn't matter if it was 8:00 p.m. We use to get up to 20 calls a week, was going to buy a blocker but with this ACT,I was able save our money and use it to pay our bills.Please don't let money make your make mind.Thank you for your attention to this message.
